Council Declares Civic Half Holiday Next Friday

A regular meeting of the town council was held Monday evening with Acting Mayor U. A. Jones in the chair and Councillors Hunter, Wilson, Michael, Bollinger and Pettit present. It was decided to declare Friday afternoon, August 14, a civic half holiday in order to give everyone an opportunity to attend the sports to be held at day at the race track.

A delegation from the Legion and Chamber of Commerce was present to obtain information with regards to the intentions of the council in connection with the skating rink.

Chas. Hutton informed the council on behalf of the Crown Lumber Co. that Crown Lumber Co. would donate cement equal to the amount needed to place a foundation equivalent to the one under the old rink or would give a cash donation and would also furnish the lumber required at cost and also offered to purchase the lots used for the old skating rink, and also make them revenue bearing, provided that the rink was moved to a new site.

Harvey Bogate stated that the Legion had held a meeting with the idea of giving a new rink to the Legion for next winter. Cam Evans had offered to bulldoze the site and level it off. Harvey also asked the council if they would reserve certain lots in the west end for the proposed rink. He also asked if a council would be able to spend the money received for the rink, \$1,421 to the new rink. They thought it was money might be no used.

A letter had been received from National Housing and was ordered filed for future reference. The water committee was instructed to speak up with Jack and the matter of connecting the reservoir to the water system.

The R.C.M.P. contract duly signed had been received. It was decided to purchase from W. Pettit a Garden All for the use of the town.

Wedding

FLUTER-KILCUP

A late afternoon wedding took place at the home of Mr. and Mrs. J. C. Kilcup, Sunday, Aug. 9, when their eldest daughter, Aileen Joan, became the bride of Mr. Stephen Fluter of Brooks, second son of Mr. and Mrs. Peter Fluter of Kayville, Sask.

The ceremony was performed by Rev. Wm. Morrison of Gleichen United Church. The bride, given in marriage by her father, wore a dark blue suit with accessories and a corsage of white gardenias and stephanotis. She was attended by her sister Dawn Kilcup, who was a girl suit with white gardenias and corsage similar to the bride's.

The bridegroom was attended by Mr. L. Pettit of Arrowwood. Wedding music was played by Mrs. S. J. Hayes of Arrowwood, aunt of the bride. During the signing of the register, Mrs. Hayes played "Promise Me."

Following the ceremony a buffet lunch was served with Mr. E. Bollinger and Mrs. Hayes serving. The young couple will reside in Brooks where the groom is on the staff of the Brooks school.

FREEZING OF FRUITS AND VEGETABLES

The preservation of fruits and vegetables by freezing has been the topic of many recent articles received at the Lethbridge Experimental station. Therefore, a few words on this subject may well be worthwhile. The freezing of foods is an easy and practical way of adding much needed near-fresh vegetables or fruits to winter menus. Since the storage facilities usually are limited, it is necessary that only the best raw material be used. Garden-fresh material harvested at its optimum maturity, always preferred. The best material to follow is to use only that material which would be selected for the table.

Most vegetables, except those ordinarily used for salads, freeze quite satisfactorily, but certain varieties are much better than others. Fruits offer little difficulty in freezing; pears are the exception, which requires special treatment. If varieties agree, were selected from the "Albion"

First of this kind in Canada is this new wheel truing machine now in operation at the new \$10,000,000 diesel plant being completed by the Canadian Pacific Railway at Nelson, B. C. The unit, now in operation here, permits diesel locomotive wheels to

be machined without removing either the wheels or trucks from under the locomotive, and will be used in the servicing of diesel locomotives operating on the Kootenay-Kettle Valley divisions of the C.P.R. in southern British Columbia. Its purpose is to

to Horticultural Guide, "no difficulties should result. Corn varieties may offer some difficulty as many will not produce a good product from on the cob, but are quite satisfactory when removed from the cob. Blanching for 2 to 4 minutes is necessary for all vegetables to ensure retention of color and flavor in storage. Color and flavor are destroyed by certain enzymes which are not destroyed by heat, will remain active at very low temperatures. Over blanching must be guarded against, as this can be as damaging to flavor as under-blanching. Chilling immediately after blanching tends to remove much of the heat, thus facilitating more rapid freezing.

Vegetables and some fruits preferably are packed in a dry sealable plastic bags which usually are placed in cartons to prevent puncturing. Most fruits best retain their flavor and color in syrup or dry sugar packs. In addition, the syrup for peaches should contain 200 mg. of ascorbic acid per cup to prevent browning. Brine packs are no longer recommended for vegetables.

Most fruits best retain their flavor and color in syrup or dry sugar packs. In addition, the syrup for peaches should contain 200 mg. of ascorbic acid per cup to prevent browning. Brine packs are no longer recommended for vegetables.

Fred Wm. Cameron

Frederick Wm. Cameron, C. P. R. station agent died of heart failure in his sleep early last Thursday morning. Mr. Cameron had appeared in good health previously, carried out his duties at the station all day Wednesday and had not complained of illness.

He was 49 years of age and was born at Sileston, N. D. and came to Canada 28 years ago. He spent 31 years as telegrapher in the local station, then transferred to station agent. About five years ago he was returning to Gleichen to take charge of the station which position he held until his death.

Mr. Cameron was the most popular and obliging station agent Gleichen ever had.

Besides his wife he is survived by one daughter, Mrs. Silver, and two brothers, Ernest and Edward of Vancouver, one sister Ann.

The remains were shipped to Vancouver Saturday evening by G. W. Evans for service and burial.

The Standard Gravel Company last week laid a hard top surface in the city's new rink. An new Gleichen has one of the finest equipped curling rinks along the line. The smooth top will permit dancing. About three feet of gravel was first placed on the floor of the rink and then rolled down. The rest of the work was done exactly like the rink at the city. The rink was top coated with cement to make it smooth for dancing.

Town & District

Mayor H. Colpoys is slowly recovering from an illness that has confined him to the Holy Cross hospital in Calgary for several weeks.

N. T. Prezell, our assistant postmaster, has returned from his holidays and is back on the job in the post office. He went to Nova Scotia to visit relatives and on his return went to Banff for a few days. Mr. Prezell says he had a wonderful trip.

Mr. and Mrs. Glen Horne of Okotoks spent a few hours in town Monday visiting friends. They were very recently married and have just returned from an extended honeymoon. Mr. Horne made his home in Arrowwood for most of his life, and in order to get to his home in Arrowwood, he had to take his vote in Arrowwood.

Mr. and Mrs. Pete Elshag of Black Bluffs, spent Monday in town to visit the friends of E. Wood. While here they looked up many of their old friends. They left Gleichen about 15 years ago for Turner Valley.

Mrs. Carl McCann of Swift Current, Sask., is visiting at the home of her son Clarence Nelson.

Mr. and Mrs. Clarence Jarvis of Olympia, Wash., paid a short visit to friends and old neighbors. Mr. Jarvis used to farm north of town but sold out and left thirteen years ago. He is at present in the plywood business in Olympia.

Mr. and Mrs. Stuart Hampton took an extended holiday starting this weekend. Mr. Hampton has not been enjoying the heat of health lately and believes an extended holiday would be advisable. He is manager of Shoprite Stores here and during his absence Mr. C. Kelly of Big Valley will have charge of the store.

For the first time in history Gleichen main street has been closed. This was done Monday by Standard Gravel Company.

FROM THE FILES OF THE CALL TWENTY YEARS AGO

Mr. and Mrs. Rimmer have moved from the H. Hutchison house and are occupying the residence of Jack Moss.

The town irrigation system is certainly saving the gardens. If it were not for the water every garden in

town would look like a sun baked desert instead of a place of beauty.

Mr. and Mrs. C. W. Halstead and family have moved to the brick residence they recently purchased from J. Christensen, located near the home of W. James and until recently occupied by Mr. and Mrs. E. Garland and family.

The many friends of P. Kelly will be pleased to learn that he is recovering very nicely from a badly fractured leg he sustained while cranking a car some weeks ago.

Mrs. J. Moss and children have left for Vegreville. Before leaving the Milnet Hockey Team entertained Bobby to a party when a pleasant evening was spent playing cards and games. Milton Davidson, the manager of the team, presented Bob with a lovely belt or belt on behalf of the team.

Cliff Flory has purchased from town three lots adjoing W. Reid's residence and is a present boy offering a cellar. As soon as the basement is ready he will move his residence on to the property.

Joe Laskowski, section hand at Redden has left for Europe to visit his parents in Poland. This is Mr. Laskowski's first visit to his home since he came to Canada in 1912.

Some say animals do not reason but that is not true, they sometimes do something just as effective, according to a story. It happened on a farm near Gleichen. When two playful males threatened to trample a two year old child an old family horse picked up the child by the seat of the trousers and held him out of harm's way until his father came to the rescue.

Mr. and Mrs. H. H. Ellis and son are leaving for the States where they will live in future.

A Yorkville pig club for boys and girls of the district has been formed. The following is the slate of officers: Pres. E. Ferguson; Vice-pres. D. Sammons; secy. W. Ferguson. Other members: M. Wilson, D. McArthur, R. Elder, O. Ferguson, G. Hall, F. Ferguson, J. Umbrite, F. Harrison and R. Burns.

At Carlson, Sunday, Max Yates won the silver cup donated by the Carlson tennis club for the champion player of the district in the men's singles.

QUESTIONS and ANSWERS

Question: How does cancer kill? **Answer:** Cancer kills by interfering with vital functions of the body. The patient may starve to death, bleed to death, be unable to carry out necessary vital activities, because of interference with nervous control of these activities, and by other means.

OUR COMPLETE SHORT STORY

THE PLAN

By ANNA E. WILSON

TED HAZEN often said that folks would be happier if they only realized that had luck has a way of changing into good luck if their work was well done. Then he'd chuckle and tell about the time he'd drawn the plans for the town hall. Ted was just out of college then and all he'd needed to become a good architect was a bit of shaping by slow, drawing Cal Brown and maybe a lesson from old Jed Haynes on his duty to his fellow men.

Ted hadn't finished the plans until the last day allowed by council for turning them in. He had run a thread through his hair and smiled at John Hare. "There it is, Jo."

Jo was a sensible girl with brown eyes. "It'll be wonderful. When I showed the extra blueprint to Mr. Craven he said he'd never seen anything so well-planned."

Ted's tired shoulders had lifted. "Mr. Coombs and Mr. Frayne and Mr. Mortuary are all for it, Jo, and they are the richest men in town. All I have to get now is the approval of Jed Haynes. Said when Jed Haynes explains the idea to council, they mostly agree to go his way. If the plans are accepted—well, Jo, we're made."

Jo had sighed. "There's been no other plans put in except Cal Brown's. Cal says his look like a

Worry of FALSE TEETH Slipping or Irritating?

Don't be embarrassed by loose false teeth slipping, dropping or wobbling when you smile or speak. You can avoid this by using the famous "KIDNEY PILLS" which are sold everywhere. This pleasant powder gives a remarkable amount of relief to the sufferer by holding places more firmly. No gum, no odor, no taste, no harm. It's alkaline (non-acid), and PAINLESSLY removes the cause.

Fashions

Quick! Sew Two!

The next day he'd been still fabled when Ted Haynes called on him. "But Mr. Haynes," he argued duly an hour later. "You can't turn my plan down. Why, the best men in town approve it."

John Hare regarded him from under a shaggy brow. "Yes, that's so, Ted. I approve of it myself but I'm not going to pay for it. The money for it is borrowed and the taxes over a period of years. Who'll pay the taxes? Not Craven. His money is just over the line. Not Coombs. As his nearly seventy and his estate goes to a nephew. Not Frayne. No, Ted, it's the farming folks who are going to pay and with what? They've just had a crop to keep down expense. Now this plan of Cal's is a usable job."

Cal had been humiliated. This had been his chance and he'd lost it for want of common sense. He had thought bitterly of Cal Brown who had been so full of praise, knowing what would happen all along. He'd hunted up his fishing rod and tramped until he had worn his frustration. And until he had remembered Joan. Nothing could go so very bad while he still had Joan.

He collided with her at the office door. She was breathless. "Ted, where have you been? Mr. Craven's been looking all over for you. Wants you to draw the plans for his summer cottage and Cal Brown says that a couple of men on the council want to see you about plans of their own. Why, Ted?"

Funny how much he'd wanted to kiss Joan. Over coffee they summed up his was breathless. "Ted, where have you been? Mr. Craven's been looking all over for you. Wants you to draw the plans for his summer cottage and Cal Brown says that a couple of men on the council want to see you about plans of their own. Why, Ted?"

Plant Breeders Winning Fight With Grain Rust

EDMONTON—Canada's plant breeders say they are winning the fight against rust but even the work of the old enemy is right on their heels.

The never-ending fight—test tubes and patience lined up against nature—has entered a new phase with nature scoring the opening blow. Rust, a fungus much like yeast or common athlete's foot, has been threatening grain fields of Western Canada and the United States for as long as farmers can remember.

As federal government cereal laboratories, such as that in Edmonton, developed stronger wheats to withstand rust, nature in its ill-humored fashion developed a stronger rust.

The latest is Race 10B, a harder cousin of Race 10A. It was first found in the Regina district, just a few years after the Winnipeg laboratory bred a new answer to Race 10B. Now the fight goes on, in the laboratories and in small plots on private farms where growers don't turn their time in a common cause.

The grower knows what damage rust can do. About 37 years ago it destroyed an estimated 100,000 bushels of grain on the Canadian Prairies.

Rust showed up at the earliest recorded date in Manitoba this year and the danger was increased because of late crops. Eating quickly into what stalks and leaves, the 230 known strains take a yearly toll in poor yields and damaged kernels.

To the laboratories has fallen the task of finding new wheat strains capable of resisting the blight. But their work doesn't end there.

The Winnipeg laboratory developed a new potato. The Edmonton lab has come up with a more convenient method of combating loose barley smut.

The smut, another fungus, turns kernels into fine brown powder. The seedling seedlings were unharmed during excavation for a new building here. A search failed to produce the smut, and it was believed the bones were those of belated Indians.

The new method uses water and a fungicide called pergon and the water doesn't have to be hot.

Two Newspapermen Have Combined Age of 157 Years

THE ABOVE SNAPSHOT REPRODUCTION WAS TAKEN AT A BANQUET HELD IN VERMILION ON MAY 14 LAST. THE TWO PARTIES PICTURED ARE S. F. COOPER, (RIGHT), AND A. L. HORTON. MR. COOPER, WHO IS 70, CENTRE, PRESENTED TO RETIRE FROM ACTIVE WORK ON THE VERMILION STANDARD IS 80 YEARS YOUNG, WHILE THE OTHER GUY CONTRASTS TO A VERAL 77. THUS THEIR COMBINED AGE IS 157 YEARS, WHICH AT LEAST 30 HAVE BEEN SPENT IN ONE FORM OR ANOTHER IN THE PRINTING AND NEWSPAPER BUSINESS.

MR. COOPER FOUNDED THE VERMILION STANDARD IN 1909, IN SUCCESSION TO THE VERMILION SIGNAL, WHICH WAS EDITED BY W. B. CAMERON, THE WELL-KNOWN AUTHOR OF THE "WAR TRAIL OF BIG BEAR."

MR. COOPER AND MR. HORTON HAVE BEEN INTIMATE FRIENDS FOR NEARLY 50 YEARS AND SHARE SOME COMMON EXPERIENCES. IN FACT, THERE IS LITTLE ABOUT THE WESTERN NEWS-

paper business which they do not know. In their younger days, they also shared a great liking for the winter recreation of curling. But not any more. No Skunk Oil, no other patented preparation can restore the necessary lubrication for these old joints.

The picture, of course, does not do justice to either of them. Nothin' could.

While the two above gentlemen we believe have a record, there are also other pioneer newspaper men in Alberta that come near a record. Fred Turner, of the Red Deer Advertiser, has been there since 1909 along with F. W. Galbraith, father of Phil Galbraith, the present publisher. Then there is Charlie Willis, of Stettler, Alta., who also came along in 1909 from Manitoba and has continued at Stettler.

At the request of the Canadian Beet Growers' Association, a British firm has designed a new type of windrowing sugar beet harvester, the first production model of which is on its way to Canada.

Normally, sugar beet harvesters have a rotary attachment which drops the topped beet into a following leading trailer, necessitating a full-time driver. In place of the elevator the harvester designed for Canada has a windrowing conveyor which can winnow the beet from six rows into one line. It can be adjusted to windrow each of the six rows in succession. When this operation has been completed, an automatic loader is driven down the line and loads all six rows at one sweep. This means that, on a large farm where a number of harvesters are employed, the leading vehicle is operating at maximum capacity and can often deal with loads from two harvesters instead of one.

In all respects, except for the conveyor, the harvester being manufactured for Canada are of standard design, the process being for the beet to be topped and lifted in the normal way.

The gondolas of Venice must be black since no other colors are permitted.

The gondolas of Venice must be black since no other colors are permitted.

At the request of the Canadian Beet Growers' Association, a British firm has designed a new type of windrowing sugar beet harvester, the first production model of which is on its way to Canada.

Normally, sugar beet harvesters have a rotary attachment which drops the topped beet into a following leading trailer, necessitating a full-time driver. In place of the elevator the harvester designed for Canada has a windrowing conveyor which can winnow the beet from six rows into one line. It can be adjusted to windrow each of the six rows in succession. When this operation has been completed, an automatic loader is driven down the line and loads all six rows at one sweep. This means that, on a large farm where a number of harvesters are employed, the leading vehicle is operating at maximum capacity and can often deal with loads from two harvesters instead of one.

In all respects, except for the conveyor, the harvester being manufactured for Canada are of standard design, the process being for the beet to be topped and lifted in the normal way.

The gondolas of Venice must be black since no other colors are permitted.

WOMEN TODAY...

They do most of the family
buying, much of family banking. They
find the bank a safe, handy place to
keep money; they like to pay larger bills
by cheque. Going to the bank is
often as much a part of the shopping
day as a trip to the local stores.

THE BANKS SERVING YOUR COMMUNITY

HERE AND THERE

Mr. and Mrs. T. C. Brown and family spent a few days at the Olds fair last week.

Mrs. Sammons, Sr., has returned home from a visit to her son, Denton, at Trail, B. C.

Mr. and Mrs. W. Busby had for visitors one day last week Mr. and Mrs. D. Hardwick and Mr. Geo. Gooderham of Calgary.

Monday afternoon Mrs. Stewart Henry and son of Brooks, called on his aunt Mrs. N. A. Eidel enroute from Mooseleigh to Brooks.

Mrs. Thompson and two boys of Calgary and Mrs. Thompsons sister, Merna, are guests at the home of Mr. and Mrs. J. E. Holland this week.

Miss Gale Cousineau of Morley is visiting her friend Miss Laurels Bogie this week.

The Gleichen F.W.I.A. held a meeting on August 6th at the home of Mrs. L. Nerland with 17 members and six visitors present. Final arrangements were made for the annual picnic on August 10 at the Bow River. The white elephant was enjoyed by all who members.

Major and Mrs. Rundson, The Salvation Army, Saskatoon spent a day last week visiting Major and Mrs. A. F. Parkinson at Eventide Home and some of the guests living there. Major Rundson was a member of his staff at the Home for sometime and about five years ago was transferred to Port Arthur, Ont., and from there moved to Saskatoon.

Mrs. Fred Habke announced that her youngest sister has just given birth to her second set of twins.

Last Wednesday evening the annual meeting of the Meadowbrook Hall shareholders was held at the hall. A

NOTICE

IN THE MATTER OF THE GAS RESOURCES PRESERVATION ACT, BEING CHAPTER 2, STATUTES OF ALBERTA, 1940, (SECOND SESSION), AND AMENDMENTS THERETO, AND

IN THE MATTER OF THE APPLICATION OF MID-CONTINENT PIPELINES LIMITED.

TAKE NOTICE that an application will be made, on behalf of MID-CONTINENT PIPELINES LIMITED, to the Petroleum and Natural Gas Conservation Board for a permit to remove gas or cause it to be removed from the Province of Alberta, for use or consumption elsewhere (than within the said Province, under the provisions of The Gas Resources Preservation Act, being Chapter 2 of the Statutes of Alberta, 1940 (Second Session) and amendments thereto).

AND FURTHER TAKE NOTICE that the said Board has fixed the hearing of the application for 8 o'clock in the forenoon on the 24th day of August, 1953, at the Court House in the City of Calgary, in the Province of Alberta.

DATED at the City of Edmonton, in the Province of Alberta, this 31st day of July, 1953.

MID-CONTINENT PIPELINES LIMITED,
By its Solicitors:
SMITH CLEMENT PARLEE & WHITTAKER,
Barristers & Solicitors,
504 Bank of Commerce Building,
Edmonton, Alberta.

committees was elected with some old members going back on a motion of appreciation passed thanking the board for the good work and improvements of the past year. A new project is underway to gravel the road to the hall. It is hoped this may be completed this fall.

Miss Henrietta Riddell of Calgary spent the week visiting her uncle Walter and Norman Riddell.

Every person who has conducted a business in which the extending of credit is practised must be impressed with the number of people in the world who appear to be honest and decent. There are a few in every community who manage pretensions to business and social standing, yet never know how to pay a bill, and no difference between one who fails to pay an honest debt when he can pay it and one who robs a till or cracks a safe. In fact, if there be any decency in either it appears to be on the side of the common criminal, who at least does not abuse confidence and friendship. Credit bureaus are gradually making the path of the dead-beat a little more thorny, but it is still forthright to an extent that is a serious handicap to honest citizens.

Less than one fourth of Canada's known hydro electric resources are in use.

OBITUARY

WILLIAM MAY

William May who came to Gleichen three years ago from Kitchitico, Alta., died last week at the age of 63 years. He was born in West Virginia and came to Alberta 28 years ago. The funeral took place Wednesday afternoon at 1:30 with Major A. F. Parkinson and E. Broom of the Salvation Army officiating. Interment was made in Eventide cemetery.

JAMES G. HARPER

James George Harper, a guest at Eventide Home for the past two years, died early last Wednesday morning. He came to Gleichen from Lethbridge and for many years was a teacher of music in that city. He was born in Preston, England, and lived in the province for over 40 years. He is survived by his wife. The remains were shipped to Lethbridge for burial by G. W. Evans.

Agriculture as a Profession

(Trained Agriculturalists Needed)

Canada, as well as every other agriculturalist in the world, is in need of more University-trained agriculturalists.

Deciding What To Do. Young men graduating from the High Schools of Western Canada this year are faced with the important problem of deciding what to do. Should I go to University and, if I do, what should I take up as my life work? The factorist must be considered in this decision are: What do I want to do? What are my special interests and talents? What can I do best? What profession offers the best assurance of a job?

Many Opportunities. Today, there are many, many opportunities for University-trained young people. Perhaps, from the dollar and cent point of view, such professions as medicine, law and engineering may be more attractive than agriculture. Success in law, however, cannot be measured in dollars and cents alone. For the farmer-raised young person particularly, no profession can provide a more satisfactory life work than agriculture. For those who cannot or who do not want to engage in active farming there are many other fields of equipment available—agriculture research work, extension teaching, journalism, industry, to mention only a few.

A New Understanding. The people of Canada are beginning to recognize the importance of agriculture as a profession. And well they should for agriculture is one of the most exciting and scientific occupations to which any man can put his hand. Agriculture is a profession, and a profession that makes demands upon intelligence, training, vision and personal moral qualities. We strongly urge all University-minded young farm people in Western Canada to consider continuing their education in Agriculture. Write today to the Dean, Faculty of Agriculture, of your provincial University for information on University training in agriculture.

For completeness and finally it would be hard to best a report recently made to a mercantile agency regarding the credit standing of a merchant. The reporting correspondent wrote: "Credit O.K. Has been out of business sometime. Also dead."

For a good while it has been the fashion among certain writers and speakers to condemn young people of the present, charging them with being wild frivolous immoral and wasteful. The examples of the small minority have been held up as representing the tendencies of the entire body of modern youth. Many thoughtful persons who are in position to observe conditions do not take this view however but incline to the belief that the younger generation will compare favorably with those of the "good old days." One college professor believes that the students of today seem on an average to be distinctly superior to those of former times in "breadth of outlook, sincerity, range and vividness of intellectual interest and essential stability of character."

CLASSIFIED ADS

FOR SALE, OSTRANDER HOUSE—Will consider sale to person making highest offer for cash only. As preference will also consider terms with a substantial initial payment. Offers to be distinctly superior to those of former times in "breadth of outlook, sincerity, range and vividness of intellectual interest and essential stability of character."
